Centers

Healthcare

BMS / SCADA Industrial Automation System Integration

PLC/DDC driving intelligent design

Expert in major stand-alone and redundant PLC/DDC systems, Simple, low-cost, and easy programming solutions

Proactive BMS maintenance

BMS/ IoT system maintenance, and sensor calibration/ servicing

BMS network design

BMS network—the backbone of smart buildings / cybersecurity

SCADA smartOps

Graphical displays, equipment status, scheduling, and logging

Smart Building controls (IoT)

Connecting devices and intelligence to create efficient, responsive, and sustainable buildings.

AI-Driven Predictive optimisation

AI-powered optimisation for smarter, greener, and cost-efficient operations.
